DESCRIPTORS: *Polyvinyl chloride, *Vinyl radicals,
*Acetates, Mixtures, Chemical analysis, Reagents,
Ethylenes, Dioxides, Sodium compounds, Ethanols,
Hydrates, Silver compounds, Sulfates, Sulfuric acid.

The authors discuss a generalized method of saponifi-
cation to determine the percentage of vinyl chloride in
mixed polymers of vinyl chloride and vinyl acetate. All
the methods heretofore used and which lead to reproduc-
ible results for mixed polymers produced by solution or

(NASA TECHNICAL TRANSLATION F-54. Transla-
tion from Zeitschrift für Physik, v. 129, no. 3, 1951,
p. 327-342 (Germany).)

The report presents a method of measuring the tem-
perature distribution across an arc column by use of
a spectrograph. An equation is developed for the
determination of the electronic temperature that cor-
responds to the point of maximum spectral line inten-
sity across an arc column. A graphical solution is
given which relates the various parameters such as

Trans. of Zeitschrift für Physik (West Germany) 1951,
v. 129, p. 327-342.

A method is presented of measuring the temperature
distribution across an arc column by use of a spectro-
graph. An equation is developed for the determination
of the electronic temperature that corresponds to the
point of maximum spectral line intensity across an arc
column. A graphical solution is given which relates
the various parameters such as statistical weights,
